The *National Geographic Venture* is a state-of-the-art expedition ship ideal for discovering remote locations in domestic waters.

Following the build of *National Geographic Quest* at Nichols Brothers shipyard, her sister ship the 100 guest *National Geographic Venture* floated into the bay on Whidbey Island, becoming the 4th ship in the Lindblad fleet built at this storied PNW shipyard. In the 1970s, Nichols Brothers built the twin ships *National Geographic Sea Bird* and *National Geographic Sea Lion*, which continue to sail the waters of the west coast of North America and Central America.

Venture, like much of the wildlife she follows, is migratory. She follows the seasons from Alaska, along the coast of British Columbia, up the Columbia & Snake Rivers, and along the Baja coast and into the Sea of Cortez. In each region, her design innovations were informed by 50+ years of expedition expertise to ensure extraordinary discoveries. Larger than her sibling twin ships, *National Geographic Sea Bird* and *National Geographic Sea Lion*, *National Geographic Venture* has the same shallow draft, enabling her to nimbly navigate the same inner reaches and provide the same intimate, 'insider' experiences of the charismatic regions we explore.

Like her sister ship *National Geographic Quest*, *National Geographic Venture* has dual boarding platforms, enabling our team to load two Zodiacs at once means guests get off ship quickly, to take advantage of wildlife sightings and maximize exploring time. Modern, cleaned-lined, with large expanses of glass to keep you connected to the extraordinary views, *National Geographic Venture* enables you to see, do and experience the best of her geographies.

***National Geographic Quest*, built in 2017, is designed for sailing into fast-moving channels and shallow coves in pan-American waters.**

When she rolled out of Nichols Brothers shipyard and into the bay on Whidbey Island, the 100 guest *National Geographic Quest* became the third ship in the Lindblad fleet built at this storied Pacific Northwest shipyard. In the 1970s, Nichols Brothers built the twin ships *National Geographic Sea Bird* and *National Geographic Sea Lion*, which continue to sail the waters of the west coast of North America and Central America.

National Geographic Quest was purpose-built to explore the fast-moving channels and narrow straits of Alaska, along the coast of Costa Rica, and into the gray whale nursery lagoons of Baja, her design and engineering informed by our nearly 40 years of experience in these regions. Her twin boarding platforms, for example, were suggested by a veteran staffer. Enabling our team to load two Zodiacs at once means guests get off the ship quickly to take advantage of wildlife sightings and maximize exploring time.

Larger than her siblings *National Geographic Sea Bird* and *National Geographic Sea Lion*, *National Geographic Quest* has the same shallow draft, allowing her captain to navigate the same inner reaches and provide the same intimate, "insider" experiences in these charismatic regions. Modern, clean-lined, with large expanses of glass to keep you connected to the extraordinary views, *National Geographic Quest* enables you to see, do, and experience the best of her geographies.
