Meals included: breakfast, lunch, dinner

◇ DAY 5

Moji

With its position along the historic route between Honshu and Shanghai, Moji has a long history as a prominent trading post. As modern shipping shifted to a newer harbor, the district settled into a gentler rhythm, allowing its heritage to take center stage. Step back in time as you stroll the promenade, exploring the well-preserved buildings of the Meiji and Taisho periods. Moji is also known for its limestone caves, and you'll have the chance to explore one of these remarkable formations to witness the region's stunning geology.

◇ DAY 6

Busan, South Korea / Gyeongju

Dock in Busan and travel to Gyeongju, the ancient capital of the Silla kingdom and the crown jewel of Korea's cultural heritage. Filled with ruins of temples, pagodas and palaces dating back more than a thousand years, the city's historic areas have been collectively designated a UNESCO World Heritage site. Visit Bulguksa Temple, a masterpiece of Silla architecture originally built in A.D. 528, and explore the Gyeongju National Museum to view jewelry, weapons and other Silla artifacts. ◇ DAY 8

Kanazawa

Step into old Japan in Kanazawa, once a powerful stronghold of the Maeda clan. Stroll past the elegant wooden samurai homes of the Nagamachi district, where intentionally narrow, winding streets were designed to confuse would-be attackers. Continue to the geisha and teahouse district of Higashi Chaya Machi before wandering the pathways of Kenroku-en, one of Japan's designated "three best landscape gardens." Established in 1676 by the Maeda family and refined over more than 150 years, it remains a masterpiece of Japanese garden design.

Meals included: breakfast, lunch, dinner

◇ DAY 9

Fushiki, Toyama

**The sister ship to *National Geographic Endurance*,
she explores polar & temperate regions**

Our second new polar build, *National Geographic Resolution*, is named to honor the second voyage of the legendary Captain James Cook.

A fully-stabilized vessel of the highest ice class (PC5 Category A), she will enable adventurous guests to go where few have or can. *Resolution's* most striking exterior feature is her distinctive profile, the patented X-Bow®, a game-changing design that guarantees the smoothest, most comfortable ride in all kinds of conditions; and since it eliminates bow impact, a quieter ride, as well.

An equally impressive feature may well be her capacity: she carries just 138 guests, a commitment to expedition excellence over scale. Scandinavian-inflected, luxuriously appointed, her inviting interiors would be a destination in themselves. Because she is a Lindblad expedition ship, however, her attention is focused on the world outside— with acres of window glass to keep you connected to the stunning views beyond the pane, and a fleet of expedition tools to get you out exploring.

National Geographic Endurance and *National Geographic Resolution* are next-generation expedition ships. Purpose-built for polar navigation. Fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessels, they are designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. The patented X-bow[®] is key to their design; its powerful wave-slicing action provides an extremely smooth ride even in adverse conditions, and even reduces spray on deck for superior observation. They carry a full suite of expedition tools, and offer a variety of experience enhancing amenities.
