The *National Geographic Venture* is a state-of-the-art expedition ship ideal for discovering remote locations in domestic waters.

Following the build of *National Geographic Quest* at Nichols Brothers shipyard, her sister ship the 100 guest *National Geographic Venture* floated into the bay on Whidbey Island, becoming the 4th ship in the Lindblad fleet built at this storied PNW shipyard. In the 1970s, Nichols Brothers built the twin ships *National Geographic Sea Bird* and *National Geographic Sea Lion*, which continue to sail the waters of the west coast of North America and Central America.

Venture, like much of the wildlife she follows, is migratory. She follows the seasons from Alaska, along the coast of British Columbia, up the Columbia & Snake Rivers, and along the Baja coast and into the Sea of Cortez. In each region, her design innovations were informed by 50+ years of expedition expertise to ensure extraordinary discoveries. Larger than her sibling twin ships, *National Geographic Sea Bird* and *National Geographic Sea Lion*, *National Geographic Venture* has the same shallow draft, enabling her to nimbly navigate the same inner reaches and provide the same intimate, 'insider' experiences of the charismatic regions we explore.

Like her sister ship *National Geographic Quest*, *National Geographic Venture* has dual boarding platforms, enabling our team to load two Zodiacs at once means guests get off ship quickly, to take advantage of wildlife sightings and maximize exploring time. Modern, cleaned-lined, with large expanses of glass to keep you connected to the extraordinary views, *National Geographic Venture* enables you to see, do and experience the best of her geographies.
