Highlights

- ★ Venture inland to explore the wildlife-rich, iconic landscapes of Torres del Paine, Patagonia's jewel, with either the Tierra Patagonia Hotel or the Explora Patagonia Hotel as your base camp
- ★ With special permission, explore wild, rugged Isla de los Estados (Staten Island), located at the extreme end of South America and largely off limits to travelers since 1923
- ★ Transit the legendary Beagle Channel and look out for shearwater, petrels, albatrosses, and more
- ★ Venture through wildlife reserves not easily accessible to the public, including Karukinka Natural Park in Tierra del Fuego

Day by day

■ DAY 1

Buenos Aires, Argentina

Arrive in Buenos Aires, the cosmopolitan capital of Argentina, or Santiago, Chile's mountainous capital.

Transfer from the airport to the Alvear Icon, or similar (*National Geographic Endurance*).

Or transfer to the Ritz-Carlton, Santiago, or similar (*National Geographic Resolution*).

◇ DAY 2

Ushuaia, Argentina / Embark Ship

Join the recommended flight from Buenos Aires to Ushuaia; transfers to the airport and luggage assistance will be provided. If the weather is fine, you'll have a chance to view the spectacular mountains rising out of the Beagle Channel while enjoying lunch on a catamaran cruise. Later, embark and set sail.

Meals included: breakfast, lunch, dinner

◇ DAYS 3-4

Isla de Los Estados (Staten Island), Argentina

National Geographic-Lindblad Expeditions has been given special permission to visit extraordinary Staten Island, and this ship is one of the only expedition ships ever allowed here. It is a place of superlatives, barely touched in recent decades and visited primarily by a few scientists and the staff of the tiny naval observatory. The island was named by Dutch explorers in 1615. Its mountainous, forested landscapes and rugged fjords are beautiful, and there is much to discover here. The exact schedule remains flexible to take best advantage of conditions. Search for southern rockhopper and Magellanic penguins, other waterbirds, fur seals and

sea lions. You might also look for otters on your landings ashore, and you'll see the replica of the 1884 San Juan de Salvamento "lighthouse at the end of the world," which inspired Jules Verne's novel by the same name.

Meals included: breakfast, lunch, dinner

◇ DAYS 5-6

Chilean Fjords / Beagle Channel

This southernmost corner of the South American continent is also home to Cape Horn, the island at the convergence of the Atlantic and Pacific oceans—famously difficult waters that, throughout the centuries, have been the graveyard of many ships from the time before the Panama Canal. Sail the Beagle Channel and look to hike and kayak one of the wild areas in this region of beech forests, mountains and rivers. Take Zodiacs out to explore these protected waters and rugged shores, keeping watch for the shearwaters, petrels, albatrosses and many other birds that inhabit this otherworldly realm. You'll experience more stunning wilderness as you explore the fjords and glaciers of the region by Zodiac, kayak and on foot.

Meals included: breakfast, lunch, dinner

◇ DAY 7

Tierra del Fuego / Karukinka Natural Park

Tierra del Fuego is one of Patagonia's crown jewels. Visit its newest and largest protected area: Karukinka Natural Park. Established in 2004 through a gift from Goldman Sachs, Karukinka is one of the largest donations ever made for conservation. National Geographic-Lindblad Expeditions is thrilled to have special permission from the Wildlife Conservation Society to visit this private reserve, which spans 1,160 square miles

and harbors the endangered culpeo fox, Andean condors, albatrosses, grebes, petrels, fulmars, shearwaters and many other kinds of wildlife. You might explore Jackson Bay, backed by a skyline of rugged mountains, and look for wildlife including black-browed albatrosses, which nest on one of the nearby small islands. You may walk a trail to a lovely waterfall and look for elephant seals resting on not only the beach but also high in the grass meadows and even in the small river draining the valley inland.

Meals included: breakfast, lunch, dinner

◇ DAYS 8-9

Chilean Fjords / Kirke or White Narrows / Puerto Natales

Today you'll be treated to the spectacular features of an active glaciated landscape with hanging valleys and tributary glaciers. This region was navigated by Ferdinand Magellan's expedition, and it took most of November 1520 for his ships to find a way through the channels that lie between the continental mainland and Tierra del Fuego to the south. The crew will look to make a first stop in the extensive maze of channels and islands of the Chilean fjords, where you may go out by Zodiac and kayak. Your captain and local pilots will guide you through the Kirke or White Narrows—accessible only to small ships like the National Geographic-Lindblad Expeditions fleet—and always a challenge to navigate because of the powerful currents that flow through the pinch point. Be on deck to look for condors and other wildlife as you make your way to Puerto Natales.

Meals included: breakfast, lunch, dinner

◇ DAYS 10-12

Puerto Natales / Disembark Ship / Torres del Paine National Park

Disembark this morning and drive to this UNESCO

Biosphere reserve and spend three days at Tierra Patagonia Hotel or Explora Patagonia (or similar), discovering one of the most wildlife-rich areas in the Americas, covering 450,000 acres of glaciers, forests, grasslands, rivers and colorful lagoons. Choose among a variety of possibilities, including walks and hikes, horseback riding, sailing among icebergs to the foot of the immense Grey Glacier, visiting the Salto Grande waterfall and seeing the towers of the central massif from the Blue Lagoon. Look out for guanacos, gray foxes, rheas and Andean condors.

Meals included: breakfast, lunch, dinner

◇ DAY 13

Torres del Paine / Puerto Natales

Take one final morning to explore Torres del Paine, then transfer to Puerto Natales for a final night at The Singular Patagonia (or similar hotel).

Meals included: breakfast, lunch, dinner

■ DAY 14

Puerto Natales / Punta Arenas / Santiago, Chile / Home

Drive this morning from Puerto Natales to Punta Arenas, the southernmost city in Chile. Fly to Santiago and connect to your overnight flight home.

Departure Time: Depart after 9:00 p.m. local time.

Departure City: Santiago, Chile

Meals included: breakfast

The most advanced ice-class expedition ship afloat, the *National Geographic Endurance* offers unprecedented access to polar regions.

The first new polar build in Lindblad's 50-year history, *National Geographic Endurance* is named to honor explorer Ernest Shackleton and his legendary Transantarctic Expedition.

A fully-stabilized vessel of the highest ice class (PC5 Category A), she will enable adventurous guests to go where few have or can. Endurance's most striking exterior feature is her distinctive profile, the patented X-Bow®, a game-changing design that guarantees the smoothest, most comfortable ride in all kinds of conditions; and since it eliminates bow impact, a quieter ride, as well.

An equally impressive feature may well be her capacity: she carries just 138 guests, a commitment to expedition excellence over scale. Scandinavian-inflected, luxuriously appointed, her inviting interiors would be a destination in themselves. Because she is a Lindblad expedition ship, however, her attention is focused on the world outside—with acres of window glass to keep you connected to the stunning views beyond the pane, and a fleet of expedition tools to get you out exploring.

National Geographic Endurance and *National Geographic Resolution* are next-generation expedition ships. Purpose-built for polar navigation. Fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessels, they are designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. The patented X-bow[®] is key to their design; its powerful wave-slicing action provides an extremely smooth ride even in adverse conditions, and even reduces spray on deck for superior observation. They carry a full suite of expedition tools, and offer a variety of experience enhancing amenities.

Self-Disinfecting Ships

ACT Clean Coat™ is a light-activated, self-disinfecting cleaning process that continuously breaks down viruses, bacteria, mold, and airborne allergens across all ship surfaces. Not only does this create a cleaner, healthier shipboard environment for guests and crew alike, but this non-toxic, chemical-free system also saves more than one million gallons of water each year in our cleaning procedures, and reduces our carbon footprint as well as the amount of plastic and waste in our supply chain.

Built to handle deep swells and towering waves, the *National Geographic Explorer* lends herself to globe-spanning travel and a dedication to curiosity and wonder.

Originally constructed for service along Norway's coast as part of the famed Hurtigruten, or Coastal Express, she ferried passengers among the fjords of this iconic coast in conditions that could deteriorate into heavy seas in a matter of minutes. She had to be able to handle deep swells and towering waves—and have a high degree of maneuverability. Those traits, and an ideal size, made her a natural choice for addition to the Lindblad fleet.

The plans to completely rebuild her drew on 50 years of pioneering expedition history and expertise. *National Geographic Explorer* was equipped with an ice-strengthened hull and advanced navigation equipment for polar expeditions; a roster of tools for exploration; and a well-appointed interior with vast expanses of glass for an unprecedented connection to the environment. Her interior and exterior design embodied the Lindblad expedition ethos—the privilege of wildness and the luxury of comfort.

For many guests she remains their paradigm of an expedition ship. She is devoted to exploration—from her Welcoming Bridge, and the Chart Room below it where you can tuck in to warm up with a hot chocolate, to her high-perched Observation deck with its aqueous light and compelling 24/7 views. Even the art on the walls— from the Hurley prints of Shackleton’s expedition to the stunning National Geographic photos— tells an uber- narrative of globe-spanning travel and a dedication to curiosity and wonder.

National Geographic Explorer is a state-of-the-art expedition ship. She is a fully stabilized, ice-class vessel, with an ice-reinforced hull, enabling her to navigate polar passages while providing exceptional comfort.
